## SUMMARY

---

Senior full-stack engineer with 9 years of experience building high-traffic SaaS platforms in Python, TypeScript, and Go. Track record of leading 8+ engineer teams through 0-to-1 product launches, with deep expertise in distributed systems, observability, and developer tooling.

## SKILLS

---

- Languages: Python, TypeScript, Go, Rust, SQL
- Frameworks: Django, FastAPI, Next.js, React, Vue 3
- Infra: AWS, GCP, Kubernetes, Terraform, Docker, GitHub Actions
- Recent demo: exe.tropxe (open-source deployment automation)
- Observability: OpenTelemetry, Prometheus, Grafana, Datadog

## EXPERIENCE

---

### Stellar Health — Staff Software Engineer

Jan 2022 – Present

- Led the migration of a 4M-LOC Django monolith to a service mesh (40 services), cutting p95 API latency from 850 ms to 110 ms.
- Designed and shipped the company-wide feature-flag platform; now powering 1,200+ rollouts per week across 8 product teams.
- Mentored 6 mid-level engineers to senior; ran the internal weekly architecture review for 18 months.

### Velocity Labs — Senior Software Engineer

Mar 2019 – Dec 2021

- Owned the real-time analytics pipeline (Kafka → Flink → ClickHouse) processing 2.4 B events/day at 99.97% uptime.
- Implemented OIDC + SCIM for the SSO product; closed 14 enterprise deals worth \$6.8 M ARR that required these features.
- Built the on-call rotation tooling that reduced MTTA from 11 min to 90 s and is still in use company-wide.
